**ICS :** 67.250  
**National Ref :** UNI1612981  
**Title :** Materials and articles in contact with foodstuffs - Guide for the application of the screening tests for the identification of non intentionally added substances (NIAS)  
**Scope :** The technical standard aims to give an overall view of the analytical approaches and methodologies for the determination of non intentionally added substances (NIAS) potentially present in materials and articles in contact with foodstuffs. The application field will be extended to materials other than plastic ones (such as paper, inorganic materials, others...). The referenced chemical moieties will be elements and low/middle/high molecular weight organic compounds.

**Title :** Threaded tubular rivets with hexagonal and partially hexagonal shank  
**Scope :** This document specifies the dimensional characteristics and technical requirements of threaded tubular rivets with hexagonal and partially hexagonal shank, with low and average grip range. These rivets can be used as an alternative to threaded tubular rivets with cylindrical shank in accordance with UNI1613009 , when high mechanical resistance and anti-rotation characteristics are required. These rivets are particularly recommended for assembling boxed or tubular metal sheets. The assembly of these rivets is carried out with manual, pneumatic or electric equipment.

**Title :** Ventilation and air conditioning plants - Installation and inspection of fire dampers and smoke control dampers - National supplements to ÖNORM EN 12101-8 and ÖNORM EN 15650  
**Scope :** This ÖNORM applies to fire dampers in accordance with ÖNORM EN 15650 and for smoke extraction dampers in accordance with ÖNORM EN 12101-8 and specifies requirements for installation and recurring control tests.  
 Since there is no European standard for the installation of fire dampers and smoke extraction dampers and the control tests according to ÖNORM EN 15423:2008, 5.6.5 are to be regulated nationally, these two requirements are regulated by the present ÖNORM. With regard to the control tests, the present ÖNORM also applies to fire dampers and smoke extraction dampers that have already been installed.  
 Fire protection closures on an intumescent basis with or without a movable closure element are not the subject of this ÖNORM.  
 The use of fire dampers and smoke extraction dampers is regulated by the specifications of the authorities, relevant Austrian standards and technical guidelines.

**Title :** Management system for competence compliance Requirements with guidance for use.  
**Scope :** This standard specifies the requirements and provides guidelines to establish, develop, implement, evaluate, maintain and continuously improve a compliance management system on free competition issues within an organization.

The standard is particularly applicable to risk management and control systems in the field of free competition, establishing requirements and guidelines to have models in line with the legislation applicable to organizations operating in Spain, in terms of prevention, detection and reaction against practices contrary to free competition.

This standard is applicable to all organizations, regardless of type, size, nature of activity and whether in the public, private or not-for profit sector and in the activities carried out, both by the members of the organization and by business associates who act, following instructions from the organization, representing it or in its Benefit.

All requirements specified in this document that refer to a governance body apply to top management where an organization does not have a governance body as an independent function.

The great groups of anticompetitive behaviours that can occur in an organization are:

- Collusive behaviours;
- Abuse of dominant position;
- Competition distortions produced by unfair acts;
- Economic concentrations of non-reported or authorized organizations, in its case;
- Public aids or aids from the government that exceed regulatory limits and/or may restrict free competition.
