Subsector A06: BUILDING AND CONSTRUCTION SERVICES

| | | | |
|-----------------------|--|----------------------------|-------------|
| Subsector : | A06 | Registration Date : | 2022-04-25 |
| Organization : | ASI | | |
| Country : | Austria | | |
| Project ID : | 01000151/0001 | Project | Established |
| ICS : | 91.140.10 | | |
| National Ref : | ÖNORM H 5155 | | |
| Title : | Thermal insulation of pipelines and components in building service installations | | |
| Scope : | The present ÖNORM should serve as a central document for the topic of insulation of building services systems in order to unify and facilitate the planning, execution and maintenance of insulation systems for pipelines and their components. | | |

The aim of this ÖNORM is to specify insulation thicknesses for building services systems in which a minimization of the heat flow from the transport medium to the environment or vice versa is required.

This ÖNORM is to be used for all building services systems according to ÖNORM B 2110, in which a minimization of the heat flow from the transport medium to the environment or vice versa is necessary, as well as a prevention of the dew point on the pipe and insulation material surface, especially for heating and hot water preparation - and solar systems as well as for cold water, cooling and cooling water systems and for air duct systems.

The specifications of this ÖNORM apply to systems that are inside or outside of buildings or in the ground.

Furthermore, this ÖNORM deals with the necessary corrosion protection of metallic pipe materials for heating and air-conditioning cold-water pipes.

This ÖNORM does not apply to district heating lines (transport lines, distribution lines, house connection lines and components within the meaning of ÖNORM B 2529). The house connection line ends at the first shut-off valve of the house station.

Furthermore, this ÖNORM does not apply to type-tested heat supply systems, tested storage systems in accordance with ÖNORM EN 15332, ÖNORM EN 12897 and for refrigerant lines.

| Country : | Italy | | |
| Project ID : | 01610829/0001 | Project | Established |
| ICS : | 03.040 | | |
| National Ref : | UNI1610829 | | |
| Title : | Non-regulated professions - Professional Organizer - Knowledge, skill, autonomy and responsibility | | |
| Scope : | The regulatory activity aims at defining the requirements related to the professional activity of the Professional Organizer. | | |

These requirements will be specified, starting from the tasks and activities and the identification of their contents, in terms of knowledge and skills, also in order to clearly identify the level of autonomy and responsibility, in coherence with the National Qualification Framework (QNQ). These requirements will also be expressed in such a way as to facilitate and contribute to making homogeneous and transparent, as far as possible, the related conformity assessment processes.

National Ref : ÖNORM B 8110-4
Title : Thermal insulation in building construction - Economic optimizing of thermal insulation
Scope : This Standard provides a calculation method for the economic issues of thermal insulation measures that are involved in the energy demand and consumption of the building. It applies to all types of new and existing buildings.

The fundamental principles and terminology are explained in the standard.

The main items of the standard will be:

- the definitions and the structure of the types of costs which should be taken into account for the calculation of the economic efficiency of saving options in buildings;
- data needed for definition of costs related to measures under consideration;
- the calculation method(s);
- expression of the result of the economic study.

Title : Water quality – Determination of atypic mycobacteria in water

Scope : This document specifies a method for the determination of atypic mycobacteria in water. Defines the procedures for filtration, decontamination, direct sowing of the sample on culture plates and assessment of the number of colonies forming units per volume of sample processed by the sum of the colonies. Complements microbiological analysis of hot water used for personal hygiene and the water intended for special purposes in healthcare (such as water for rinsing endoscopes and the technical water for heater-cooler devices used in cardiothoracic surgeries).

Subsector S27: WASTE - CHARACTERIZATION, TREATMENT AND STREAMS

Subsector : S27 Registration Date : 2022-04-29
Organization : UNI
Country : Italy
Project ID : 01610838/0001 Project Established
ICS : 13.030.01
National Ref : UNI1610838
Title : Waste - Manual sampling and preparation of sample and analysis of eluates
Scope : This standard describes:

- the process of definition of a sampling plan;
- manual sampling techniques of liquid, granular, pasty, coarse, monolithic and sludge waste in relation to their different physical state and short-term conservation;
- procedures for reducing the size of samples of waste taken in field, in order to facilitates transport to the laboratory;
- documentation for the traceability of sampling operations;
- Procedures for short-term packaging, preservation and storage of the sample and transport of waste samples;
- Sample size reduction procedure for laboratory analyzes;
- Preparation procedures and analysis of the eluates.

This standard applies to all types of waste, such as liquid waste, liquefied by heating, liquid sludge, pasty sludge, powder or granular waste, coarse, monolithic or massive waste.

Title : State-of-the-art in the adoption and integration of management systems, management frameworks and best practices
Scope : The purpose of the Technical Report is to analyze the way in which organizations (companies and Public Administration) are using to adopt and integrate standards (9000, 14000, 20000, etc.), the major management frameworks (ITIL, Agile, COBIT, PMBoK , etc.) and specific best practices (innovation, teams, motivation, entrepreneurship, etc.). In order to know how the leading organizations are carrying out the incorporation of these new ways of working. The Technical Report is the first phase in a program destined to generate a UNE standard and later an ISO / IEC standard.
