Subsector A04: TRANSPORTATION SERVICES

Subsector :	A04	Registration Date :	2015-07-21
Organization :	IPQ	Draft Issue Date :	2015-07-06
Country :	Portugal	Latest Date for Comments :	2015-08-15
Project ID :	C1481599/0001	Draft for public enquiry	
ICS :	03.120		
National Ref :	prNP 4538		
Title :	Public passenger transport. Occasional rental service and regular specialized. Characteristics and service supply		
Scope :	This Standard aims at setting out the rules, features and the minimum qualitative and quantitative conditions of the service as well as the requirements for the provision of Public Passenger Transport Service – Occasional rental service and regular specialized. It also sets out the principles that outline the general terms and conditions of the Public Passenger Transport Service Contract - Occasional rental service and regular specialized within the most suitable legal and contractual framework. It applies to all companies in the public passenger transport sector, with the exception of taxi service, having as activity the occasional rental service and regular specialized when provided in accordance with the guidelines set out by NP EN 13816: 2003. This Standard applies to the following categories of rental services: - regular specialized; - occasional.

Title : Accessibility management systems. Requirements

Scope : This International Standard specifies requirements for a accessibility management system of to allow that an organization establish, develop and implement a policy of accessibility, with the purpose to increase the effectiveness of environmental accessibility conditions, products and services of their responsibility. This standard is applicable to any organization that wishes to: a) demonstrate their ability to consistently and continuously, provide an environment that meets the requirements of all users, regulatory requirements and other requirements to which it subscribes in promoting accessibility for all; b) establish, implement, maintain and improve an accessibility management system; c) ensure the fulfillment of its accessibility policy, promoting their follow-up, monitoring and evaluation of the results and effects; d) demonstrate compliance with this standard through certification of its accessibility

management system by an independent third party. All requirements of this International Standard are generic and are intended to apply to all organizations, regardless of type, size and environment. If any (s) requirement (s) of this International Standard can not (in) be applied (s) due to the nature of an organization and its environment, as (is) that (s) (s) may be considered (s) for deletion. If exclusions are requested, it shall be duly substantiated and is not acceptable to require compliance with this standard these exclusions affect the ability or the organization's responsibility to provide an environment that meets the requirements of users and regulatory and normative requirements in the context of accessibility for all.

ICS : 91.010.30, 91.080.10
 National Ref : ÖNORM B 1993-1-9
 Title : Eurocode 3: Design of steel structures - Part 1-9: Fatigue - National specifications concerning ÖNORM EN 1993-1-9, national comments and national supplements
 Scope : This Austrian Standard specifies national parameters to ÖNORM EN 1993-1-9 and shall be applied jointly with ÖNORM EN 1993-1-9 in Austria. EN 1993-1-9 gives methods for the assessment of fatigue resistance of members, connections and joints subjected to fatigue loading. These methods are derived from fatigue tests with large scale specimens, that include effects of geometrical and structural imperfections from material production and execution (e.g. the effects of tolerances and residual stresses from welding). NOTE 1 For tolerances see EN 1090. The choice of the execution standard may be given in the National Annex, until such time as EN 1090 is published. The rules are applicable to structures where execution conforms with EN 1090. NOTE Where appropriate, supplementary requirements are indicated in the detail category tables. The assessment methods given in this part are applicable to all grades of structural steels, stainless steels and unprotected weathering steels except where noted otherwise in the detail category tables. This part only applies to materials which conform to the toughness requirements of EN 1993-1-10. Fatigue assessment methods other than the R-N methods as the notch strain method or fracture mechanics methods are not covered by this part. Post fabrication treatments to improve the fatigue strength other than stress relief are not covered in this part.

National Ref : ÖNORM B 3346
Title : Rendering und plastering mortar - Rules for use und processing - Complementary provisions to ÖNORM EN 13914-1 and -2
Scope : The present Austrian Standard represents a supplement to the standards ÖNORM EN 13914-1 and ÖNORM EN 13914-2; it mentions the conditions as well as the requirements and rules for the processing of plastering mortars according to ÖNORM B 3344, ÖNORM B 3345, ÖNORM EN 998-1 or ÖNORM EN 13279-1 and ÖNORM EN 15824 which are applicable for internal and external plastering of walls and ceilings. The procedure specifications and contractual provisions for plastering works are defined in ÖNORM B 2210. Processing of rendering and plastering mortar for fire protection, sound insulation and for special purposes (e.g. loam rendering), of prefabricated elements (e.g. gypsum plasterboards), external thermal insulation composite systems as well as surface treatment by smoothing and levelling compounds, by coatings, paints and varnishes, etc. are not dealt with by this Standard.

Title : Standard Practice for Calculating Yellowness and Whiteness Indices from Instrumentally Measured Color Coordinates
Scope : This practice provides numbers that correlate with visual ratings of yellowness or whiteness of white and nearwhite or colorless object-color specimens, viewed in daylight by an observer with normal color vision. White textiles, paints, and plastics are a few of the materials that can be described by the indices of yellowness or whiteness calculated by this practice. For a complete analysis of object colors, by a specified observer and under a specified illuminant, use of three parameters is required. For near-white specimens, however, it is often useful to calculate single-number scales of yellowness or whiteness. This practice provides recommended equations for such scales and discusses their derivations and uses, and limits to their applicability.

Title : Language learning services outside formal education -- Requirements
Scope : The objective of this standard is to specify requirements for language learning Services outside formal education. This standard uses the term learning services, rather than training, in order to encourage a focus on the learner and the results of the learning process, and to emphasize the full range of options available for language learning.
This International Standard is intended to set minimum requirements for language learning services.
The aims of this International Standard are:
a) to improve transparency and enhance the credibility of the language learning services market;
b) to protect consumers by preventing prejudicial practices;
c) to improve the quality of language learning for all interested parties.
This standard incorporates the broad interdisciplinary expertise of various organizations involved in standardization: quality assurance, educational technology, programme evaluation, second language acquisition and applied linguistics.

Subsector T15: CYCLES

Subsector : T15 **Registration Date :** 2015-07-10
Organization : IMANOR
Country : Morocco
Project ID : 02.8.180/0001 **Project Established**
ICS :
National Ref :
Title : Fuctionel safety of tricycle - requirement

Relatedness :

National : New
 :

** End of Subsector **

Subsector T16: LIFTS & ESCALATORS

Subsector : T16 **Registration Date :** 2015-07-24
Organization : UNI
Country : Italy
Project ID : 85000630/0001 **Project Established**
ICS : 91.140.90
National Ref : U85000630
Title : Modification of existing escalators and moving walks

Scope : This standard specifies the state-of-the-art criteria for modifying or replacing parts of existing escalators and moving walks

Relatedness :

National : New

:

** End of Subsector **

Subsector T19: ROAD SAFETY

Subsector : T19 **Registration Date :** 2015-07-13

Organization : SUTN

Country : Slovakia

Project ID : 01504415/0001 **Project Established**

ICS : 01.075, 93.080.30

National Ref : STN 01 8020

Title : Traffic signing and road marking

Scope : This revision specifies additional requirements for the shapes, dimensions and illustrations of road signs and sets their functional parameters in connection to the harmonized European standard EN 12899-1 Permanent vertical road signs; national standard STN EN 1436+A1 Materials for road marking; and other fundamental European and international standards implemented into the system of Slovak technical standards, as well as current legislation.

Relatedness :

National : REV/AMD STN 01 8020: 2000 + STN 01 8020/Z1: 2003 + STN 01 8020/Z2: 2005

:

Subsector : T19 **Registration Date :** 2015-07-14

Organization : DIN

Country : Germany

Project ID : 06234812/0001 **Project Established**

ICS :

National Ref : 06234812

Title : Testing of floor coverings - Determination of the anti-slip properties - Wet-loaded barefoot areas; walking method; ramp test

Relatedness :

National : New

:

Subsector : T19 **Registration Date :** 2015-07-15

Organization : UNMZ **Draft Issue Date :** 2015-11-15

Country : Czech Republic **Latest Date for Comments :** 2016-03-30

Project ID : 73005615/0001 **Project Established**

ICS :

National Ref :

Title : Forest transportation network

Scope : The aim of the revision is up-dating of requirements contained in ČSN 73 6108:1996 according to contemporary legislation.

Relatedness :

National : REV/AMD ČSN 73 6108 (1996)
