Title :	Information technology - Service management - Part 5: Exemplar implementation plan for		

Scope : ISO/IEC 20000-1 (ISO/IEC TR 20000-5:2013)
 This part of ISO/IEC 20000 gives guidance on a phased approach to implement an SMS that fulfils the requirements specified in ISO/IEC 20000-1. The phased approach provides a structured framework to agree priorities and manage the implementation activities. This part of ISO/IEC 20000 illustrates a generic, three-phase approach to manage the implementation. The service provider can tailor the phases to suit its needs and its constraints. This part of ISO/IEC 20000 can also be used with ISO/IEC 20000-2, ISO/IEC TR 20000-3 and ISO/IEC TR 20000-4.

Title :	Identification of fluid piping in refrigeration plants		
Scope :	This Technical Guide is intended to provide the professionals of the industrial sectors of refrigeration and air conditioning, from the design phase till the commissioning of the work to the final customer, with useful information enabling at a glance the recognition of the refrigerants and other fluids used in the systems; at the same time to identify their states - liquid or vapour, hot or cold, and the direction of the flowing. It also presents the colour system to be used in refrigeration and air conditioning systems describing and stating its characteristics and the scope of the application. For various applications it presents also the possible types of inscriptions, relative sizes of labels or signals, in general conditions of application. It gives also the information about the correct application of the colours to the pipe system in each different installation, providing a complete information and the immediate identification of the flowing fluid in any part of the system. This Technical Guide is not applicable to flexible tubing/piping

Title : Refuse collection vehicles - Levels of performance and ways and conditions of acceptance for street and sidewalk cleaning and washing and municipal waste management services - Part 3: Ways to measure the levels of performance and to settle the acceptance, to draw up and to operate contracts for manual and mechanical street

and sidewalk cleaning and washing

Scope : This standard defines the levels of performance, ways and conditions of acceptance, the requirements to be taken into account to draw up and operate service contracts for:

- manual and mechanical street and sidewalk sweeping services;
- street and sidewalk washing services and walkable value area cleaning;
- accessory and additional sweeping services such as waste containers application and cleaning, weeding sidewalk, animal excrement removal, open-air market cleaning, historic or decorative fountain ordinary cleaning, used hypodermic needle and syringe collection, carcass removal.

This standard defines parameters and service elements, ways to check and to measure them, catalogue and description of the main fulfilled services, performance and quality control systems to be taken and ways to evaluate the supplied levels of performance.

This standard is applicable to leaves collection service and public parks and gardens cleaning, if included in the contract, but not their maintenance.

This standard is not applicable to graffiti and flyposting removal, beaches and cliffs cleaning.

Subsector S99: UNDETERMINED

Subsector :	S99	Registration Date :	2016-10-28
Organization :	UNI		
Country :	Italy		
Project ID :	01602096/0001	Project	Established
ICS :	03.040		
National Ref :	UNI1602096		

Title : Non-regulated professions - Health, Safety, Environment (HSE) professional profiles - Knowledge, skill and competence requirements

Scope : The Professional Profile in HSE, here described, does not modify what specified by the Italian Law (Dlgs. 81/08 and "Accordo Stato-Regioni del 26/01/2006") in terms of role, competences and relevant training for the "Responsabile" and "Addetto" of the "Servizio di

Prevenzione e Protezione” (RSPP and ASPP).

The HSE profile has specific knowledge, skill, competence and experience necessary to manage the different HSE areas, within an Organization, in terms of designing, implementation, promotion, coordination, control and technical supporting for the processes linked to Health, Safety and Environment to contribute to the efficiency of the Organization.

This Profile will be characterized by different experiences and background, by different role and operation due to the context in which he works (i.e in Organization with different level of organizational and/or technical complexity). In this sense his job could have different levels of managerial and technical content.

Starting from the job description defined in terms of tasks and experiences and taking into account the organizational heterogeneity and complexity and the different Sectors where he can perform his job, the standardization activity has the objective to identify the specific knowledge, skill and competence for the four profiles belonging to the HSE Professional Profile:

- HSE Expert Manager and HSE Manager;
- HSE Expert Technician and HSE Technician.

This Standard and the sharing of the legal ethic will define the reference framework (theoretical/technical and behavioural) to support the professional recognition and the mobility of such profiles ensuring their level of quality and professionalism in favor of not only of them but of Companies and Market at large.

The practical consequences in the national context (and European) are significant and they will contribute to enforce the continuous improvement in the area of prevention and protection of health and safety at work and environment.
