Subsector B13: SOLAR ENERGY

Subsector : B13 Registration Date : 2017-07-31
 Organization : UNE
 Country : Spain
 Project ID : P0048594/0001 Project Established
 ICS :
 National Ref : PNE 206015
 Title : Heat transfer fluids for solar thermal power plants with parabolic trough collector technology. Requirements and tests
 Scope : This standard defines the test methods for determining the physicochemical properties of organic synthetic fluids used as heat transfer fluid (HTF) in solar thermal electric plants with parabolic trough collector technology, both new and having been in service, and the measurement techniques suitable for the determination of its characteristic parameters. This standard is applicable to solar thermal electric plants of any size that use concentration systems with parabolic trough collector technology, with the Sun being the main source of

energy. Such plants may optionally have non-solar energy sources, such as natural gas or other renewable energies, and a thermal storage system.

Relatedness :

National : New

Subsector : B13 Registration Date : 2017-07-31

Organization : UNE

Country : Spain

Project ID : P0048595/0001 Project Established

ICS :

National Ref : PNE 206016

Title : Reflector panels for concentrating solar technologies

Scope : This UNE standard provides definitions of performance parameters, their minimum requirements and the testing methods for reflectors (reflector panels, mirrors and/or mirror panels) to be used in concentrating solar systems for solar thermal electric (STE) plants (also concentrating solar power, CSP) and other types of concentrating solar technologies. This standard includes the testing methods for reflectors and the supporting elements and shall be applicable to silvered glass reflectors and also to any other reflector material such as polymeric and metallic mirrors, including films, composite and laminated products.

Subsector : B32 **Registration Date :** 2017-07-31
Organization : EVS
Country : Estonia
Project ID : 00095968/0001 **Project Established**
ICS : 91.010.30, 91.080.01,
91.100.30
National Ref : prEVS/TS 1
Title : Wedge pile foundation design bases
Scope : This EVS technical specification:

- determines wedge pile shape, dimensions, rammed wedge pile's load capacity, geotechnical inspection, possible building construction support and connections design examples
- describes wedge pile selection and calculations of wedge pile as reinforced concrete, as well as methods of calculating load capacity and geotechnical designing of wedge pile foundations.
- gives instructions in geotechnical engineering of wedge pile foundations about how to use geotechnical engineering norms of prismatic piles
- defines the wedge pile, its shape, current wedge pile classification and wedge pile foundation as the part of support structure of the building and some new terms.

Title : Copper and Copper alloys - Fittings - Mechanical fittings for PE pipes
Scope : This Standard specifies the minimum requirements of technical characteristics and services of copper and copper alloys mechanical fittings with or without galvanic coating for gas transport intending natural gas and LPG with temperature and pressure indicated in this standard or in other standards recalled. Fittings considered in this standard are in conformance with UNI EN 1254-3 but different destination in service.

Title :	Workplace exposure. Determination of metals and metalloids in airborne particles. Atomic Spectrometry method.		
Scope :	This standard describes the procedure and equipment for the determination of metals and metalloids in the airborne particles at the workplace through the sampling on an appropriate collection substrate and their analysis by atomic spectrometry (AAS/F, ICP/OES or ICP/MS). The standard allows the determination of the health related fractions defined in UNE-EN 481 when the appropriate aerosol samplers were used. The procedure of measurement described can be used to carry out measurements to determine the occupational exposure concentration, measurements for comparison with limit values (occupational) to evaluate the exposition via inhalation and periodic measurements. It may also be used to carry out screening measurements of time weighted average concentration (see UNE-EN 482, 4.2) and screening measurements of variation of concentration in time and/or space (see UNE-EN 482, 4.3).

Country :	Italy		
Project ID :	01603304/0001		Project Established
ICS :	13.060.01		
National Ref :	UNI1603304		
Title :	Water quality - Determination of Nitric Nitrogen (Nitrates) in waste, natural and drinking waters with small-scale sealed-tube method.		
Scope :	The nitrates have a fundamental importance in nature and they are naturally present in ecosystems. The nitrates are also generated by human activities such as agriculture and industrial sources like food, chemical, paper production factories etc. The presence of significant concentrations of nitrates in surface, drinking and waste waters can be interpreted as a pollution index and is a potential risk for the health and the environment. This International Standard specifies a method for the determination of nitrates using the sealed tube method. The test is applicable to aqueous samples, as natural waters (including sea waters, after reduction of chloride content after filtration on silver sulphate), drinking waters and waste waters in a range of concentration between 0,2 and 60 mg/l (expressed as N-NO3).

Title : Smart Cities. Requirements of interoperability for a Smart City Platform
Scope : The purpose of this Standard is:
 1) Identify the capabilities that a city platform should have.
 2) Structure these functionalities/capabilities in a congruent Layer Model.
 3) Identify the components and modules needed to provide the required functionality to the city and place them in the Layer Model.
 4) Define the requirements that these components must cover, at interoperability level, security, performance, availability, etc.
 5) Obtain an indicator of quality of integral city platform through several metrics obtained in the transversal Platform.
 It is not the purpose of this document to define the specific communication protocols, the types of databases, the specific technical solutions of the components of the platform, nor the semantics associated with the exchange of Information, although there are some indications to allow the compatibility of applications and allow the operation and development of citizen services by entities other than developers of the platforms
