Sector B : BUILDING AND CONSTRUCTION

Register issued on : 2017-12-01

Subsector B02: STRUCTURES

Subsector : B02 **Registration Date :** 2017-11-21
Organization : ASI
Country : Austria
Project ID : 00027261/0001 **Project Established**
ICS : 91.010.30, 91.080.40, 93.040
National Ref : ÖNORM B 1992-2
Title : Eurocode 2 - Design of concrete structures - Part 2: Concrete bridges - Design and detailing rules - National specifications concerning ÖNORM EN 1992-2, national comments and national supplements
Scope : This Austrian Standard specifies national parameters to ÖNORM EN 1992-2 and shall be applied jointly with ÖNORM EN 1992-2 in Austria. This standard describes the principles and requirements for safety, serviceability and durability of concrete structures, together with specific provisions for bridges.

Relatedness :

National : New

Subsector : B02 **Registration Date :** 2017-11-28
Organization : UNI
Country : Italy
Project ID : 01603704/0001 **Project Established**
ICS : 91.060.40, 91.140.01, 97.100.30, 97.100.40
National Ref : UNI1603704
Title : In-service installations for civil use powered by liquid and solid fuel - Guidelines for verifying suitability for safe operation
Scope : The standard establishes the criteria for verifying that the safety requirements of in-service installations powered by solid and/or liquid fuels are fulfilled, regardless of the time of their installation, in order to determine whether the verified plant can continue to be used in its current state, without compromising safety.
 The standard deals exclusively with the aspects of verification of installations and therefore it cannot be used as a design standard, nor as an installation standard or for retrofitting.
 The standard applies to domestic heating and/or cooking systems powered by liquid or solid fuel, with or without the production of domestic hot water, including the works for the evacuation of combustion products.

Subsector : B25 Registration Date : 2017-11-10
 Organization : NSAI
 Country : Ireland
 Project ID : NSAI1018/0001 Project Established
 ICS : 91.140.40
 National Ref : I.S. 820:201x
 Title : Non-domestic gas installations (Edition 3)
 Scope : This Irish Standard specifies the requirements for natural gas and LPG installations in commercial and public access buildings at maximum operating pressures not exceeding 5 bar and industrial gas installations at maximum operating pressures not exceeding 0,5 bar, from the point of delivery up to and including the appliance(s) in non-domestic premises.

Relatedness :

National : REV/AMD I.S. 820:2010

Subsector : B25 Registration Date : 2017-11-06
 Organization : NSAI
 Country : Ireland
 Project ID : NSAI1026/0002 Project Established
 ICS : 23.040.99
 National Ref : I.S. 328-2:201x
 Title : Gas transmission - Part 1, Installations
 Scope : Separation of current part two of I.S. 328 into a separate standard.
 This Standard applies to the design, construction, inspection, testing, operation and maintenance of installations on pipelines used for the transmission of first and second family gases, i.e., manufactured towns gas, natural gas and substitute natural gas at maximum operating pressure over 16 bar and temperatures between -25 oC and +120 oC
 Pipeline installations include but are not restricted to pressure-reduction stations, meter stations, pig-trap stations and block valves. Compressor stations and compressed gas filling stations are excluded.
 If the inlet pipework of the station is a service line and the maximum upstream operating pressure does not exceed 16 bar and the design flow rate is equal to or less than 200 m³/h under normal conditions, EN 12279 applies.
 This Standard relates to conditions and practices currently in use in the transmission of gas. In addition materials and techniques of construction and operation are constantly being

improved. It is intended to keep these factors under continuous review. As a result amendments and supplements may be issued by the National Standards Authority of Ireland (NSAI) from time to time.

All activities covered by this code in relation to gas transmission pipelines and installations should comply with the requirements of all relevant safety, planning and environmental legislation.

 Title : Pressure equipment - Putting into service and use of pressure equipment and assemblies - Part 10: Supervision of steam boilers and/or super-heated water generators excluded from the scope of UNI/TS 11325-3
 Scope : This technical specification provides procedures for the supervision of fired or otherwise heated pressure equipment with the risk of overheating, intended for generation of steam and/or super-heated water at temperatures higher than 110 °C ("steam boilers and/or hot water generators") at a maximum allowable pressure PS greater than 0,5 bar included in the scope of the Italian decree D.M. 329/2004 and excluded from the scope of UNI/TS 11325-3, and, also, having the following requirements:
 a) unfired steam boilers and/or hot water generators in which the design temperature of the pressure bearing parts, that will come into contact with the heating fluid, is not lower than the heating fluid itself;
 b) low capacity forced-circulation steam boilers and/or hot water generators having $PS \times V \leq 3000$ bar-L and $PS \leq 12$ bar;
 c) low pressure steam boilers having $PS \leq 1$ bar, heating area ≤ 100 m² and capacity ≤ 2 t/h;
 d) low pressure hot water generators having $PS \leq 5$ bar, water maximum temperature $\leq 120^\circ\text{C}$ and capacity ≤ 2 t/h;
 e) electrically powered steam boilers and/or hot water generators.
 The technical specification gives recommendations of operation and testing of the boiler both with and without the continuous presence of the boiler attendant, with a maximum time of operation without manual intervention of 72 hours.
